

OOof box - our new private acoustic workspace

We proudly present to you the OOof box - a unique product, advanced in design & a perfect addition to our growing acoustic collection.

The OOof Box is an acoustically treated, portable space that provides semi-permeable privacy to office workers and those on the go.

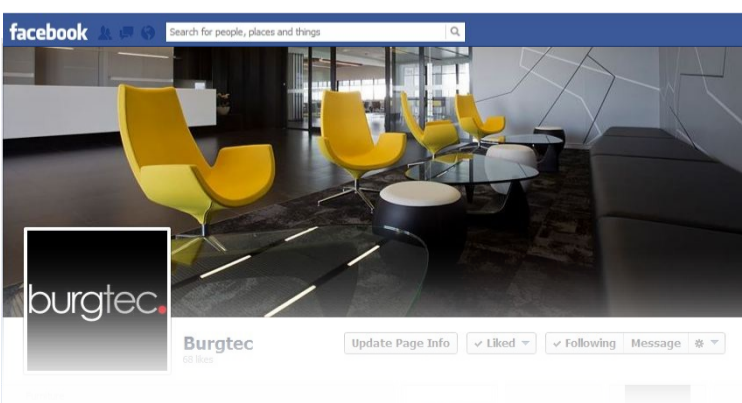

It creates a work space for people in offices and public areas, in which they can work for short periods using their smartphones, tablets, laptops etc without being distracted and without disturbing others.

A small footprint, power supply and storage space are just a few of the clever features of the OOof box. To view all the features or for more info please contact one of our friendly sales staff.

business development manager

We are very pleased to welcome Michael D'Andrea to our team. Joining us in late 2013 Michael is fast becoming familiar with Burgtec and is a valued member of the team. Michael has joined our sales department as Business Development Manager and is very experienced with 19 years in the commercial office fitout industry. We hope you will also find Michael valuable and give him a warm welcome.
