

Space - Hybrid

burgtec.

silen

Everyone can join.

Together Silen and Burgtec have recognised the need to design and build solutions that are universally accessible. With the Space Hybrid booths, everybody can join a meeting or work in silence comfortably.

Initially developed for one of Burgtecs local clients, the Hybrid booths are made with no raised floor for easy wheel-chair access. And the best part is, Hybrid booths still offer the same world-class sound reduction that the original Space booths do.

The Hybrid design has since been perfected and upgraded, researching and testing to ensure top-quality innovation and top-quality solutions with DDA Compliance - adding an automatic door thats much wider, and foldable furniture giving more room to move.

ACCESS FOR EVERYONE

No need for a ramp, Hybrid booths are floorless, with a wide sensor door for easy wheelchair access, and still boast the same acoustic properties and modularity as the world-leading Space range.

CONSIDERED ON EVERY LEVEL

Going beyond comfortable entry, Hybrid incorporates innovative folding furniture for flexibility and easy movement inside the booth.

Whether you are working hybrid or not, the Silen Hybrid range gives everyone accessibility and the option to use privacy pods to work in silence.

Features

- Carbon Neutral Certified
- UL listed with Class A in fire resistance
- Up to 40dB quieter inside
