

Hildur

Chair

burgtec.

Unassuming and reliable.

For 12 years Icelandic designer Valdimar Haroarson worked on designing the Hildur - a stackable chair that was lightweight, comfortable and multifunctional.

Stackable upholstered steel frame chairs generally weigh between 6 and 8 kg but Hildur is only 4 kg.

Its lightness means that seating for a conference or lecture hall can be set up quickly, easily and safely. It makes it simple to stack the chairs and save storage space. The Hildur stacks up to 40 chairs high.

Manufactured from durable and high-quality materials, the Hildur chair lasts longer but also has a replaceable seat and backrest to provide a sustainable solution for refreshing its appearance.

Hildur is the ideal solution for a variety of functions and spaces, both large and small.

Features

- Comfortable seat and backrest
- Seat and backrest replaceable
- Breathable fabric certified to flammability standards
- Lightweight and stackable
- Stackable up to 40 chairs
- Replaceable polycarbonate glides
- Steel frame
- 3 year warranty
- Weight rating up to 125kg

Finishes

- Base: Chrome
- Seat and Back: Black
