House Textiles

Effective January 2024

A true partnership

at work^{*} with Camira

The successful collaboration between New Zealand-based At Work* by Textilia and international textile makers Camira was born from a shared vision and enduring passion for bringing the most innovative, high-quality, and sustainable textiles to the Australasian commercial market. Originating in West Yorkshire, Camira's commitment to quality and in-house production means their products are spun, dyed, and woven or knitted on UK soil. Together, At Work* with Camira (AWWC) have been delivering a comprehensive and inspiring range of premium wools, flax blends, hemp blends, recycled yarns, polyesters, and polypropylene yarns since 2014. Well-priced and underpinned by the best service, AWWCs fabrics are trusted by furniture manufacturers and specifiers across Australia and New Zealand for workplace, education, hospitality, healthcare, and retail projects.

Working closely with our upholstery team Burgtec is constantly reviewing the material suppliers we align ourselves with, and from 2023 we have formed a mutually-beneficial alliance with AWWC, taking every factor into consideration to ensure we're always offering the best value for clients. A handpicked selection of fit-for-purpose fabrics and vinyls, our House Textiles range leaves nothing to be desired with an answer for every aesthetic and functional requirement. We're excited to see our partnership with AWWC evolve as we work together to produce world class solutions for large-scale commercial fitouts.

People are the heart of every organisation. A well-designed workplace is one that welcomes, supports and elevates. It inspires people to bring their best self to work, everyday.

At Burgtec, we're genuine about partnerships. Bringing our expertise to the table, we listen with intent to understand the individual needs of our clients. We're proud to provide service as it should be, never taking our supplier, peer or client relationships for granted.

Since 1981, we've been local first. We design and manufacture our furniture here in Australia, using locally produced materials and suppliers at every step possible. We do this because it just makes sense – quicker lead times, true sustainability, better control of budgets and never needing to compromise on quality.

A Burgtec workplace balances practical needs with good design and ingenuity. It's a space that sits right, a place that nurtures relationships and potential.
