Strata 360

Our fastest, strongest, smartest workstation

Strata 360

Our fastest, strongest, smartest workstation

Strata 360 is a premium round leg desking solution that elevates and supports people of Australian businesses every day. This workstation system is our flagship product, and now it's been upgraded being to our fastest, strongest and smartest workstation ever.

Designer	Burgtec
Features	<p>AFRDI Certified</p> <p>Compatible with all Burgtec Screens</p> <p>Available in Linear, Corner, and Back-to-Back configurations</p> <p>Cable management / softwiring options available</p> <p>Fixed Height: 720mmH (includes 25mm top)</p> <p>Electric Height Range: 610 – 1260mmH (includes 25mm top)</p> <p>Round leg design</p> <p>Integrated Bluetooth and Mobile app</p> <p>Double tap activation to avoid accidental height adjustment</p>
Finishes	<p>Worktops: Select from Burgtec house laminates range (Contrast edging available)</p> <p>Frames: All frames available in 5 Curated Palette colours plus Black or White</p> <p>Screens: Select from Burgtec house fabrics / acoustics or fabric of your choice</p>
Warranty	10 Years
Lead time	4-6 Weeks
Origin	Australia

Strata 360 Global Greentag Certified

We are thrilled to share that we have successfully renewed the Global GreenTagCert™ GreenRate™ Level C certification for our Strata 360 LINAK workstation.

The certification is a prestigious ecolabel that assesses a product's sustainability throughout its lifecycle. Global GreenTag certification is recognised globally and domestically by the Green Building Council of Australia.

This means that Strata 360 has met certain standards for sustainability and environmental impact and that you can specify our workstations in complete confidence.

Movement by electric actuator technology

LINAK® produces electric linear actuator solutions to create smooth movement in a variety of applications. From healthcare to agriculture, comfort furniture, office interiors, or industrial automation. Partnering with LINAK® Australia has brought about Strata 360 – our most advanced workstation system to date. A fusion of European technology, Australian quality and modern flair brings a fresh take on office desking to the industry, without compromising on lead-time and cost.

Desk Control™ App

Connect your Strata 360 Desk to your iOS/Android mobile device, or desktop PC with the Desk Control™ App. Auto-connect, receive motivational notifications, and access statistics to help utilise your desk's adjustment function more actively – and ultimately improve work habits.

As well as adjusting desk height, the user can also store favourite positions in the app, thus improving ergonomics by using the optimal work heights – whether sitting or standing.

DPG Control

Strata 360 Workstations feature LINAK® Desk Panel Controls with Bluetooth® wireless technology, memory and reminder functions. As intuitive as they are contemporary, the DPG Controls operate by simply tapping up or down to drive the desk, and can store four favourite positions for efficient and effortless use. The integrated LED strip flashes at optimal intervals to remind users to change positions. Featuring a minimal, discreet profile with a glossy surface and an integrated display to ensure a clean and modern design.

EXPERIENCE™

Introducing: Linak Experience

With superior lifting and holding force, a high speed of 80 mm/s, and built with responsible materials, the new EXPERIENCE™ range of lifting columns delivers enhanced performance for modern desk solutions.

Engineered to perform

The all-new EXPERIENCE™ series of lifting columns raises the bar for height-adjustable desks.

On the outside, the column looks the same as its predecessor. On the inside, revolutionary LINAK® motor and brake technologies deliver a new standard in performance: a fast speed of 80 mm/s, a load capacity of 800 N per column, and a self-lock force of 1200 N – all standard.

All these features make EXPERIENCE columns push the boundaries of what is standard and raise the bar for performance, making Strata 360 our fastest, strongest and quietest workstation ever.

Designed to last

Thanks to deliberate design choices, EXPERIENCE™ not only consumes 30% less power during operation but is also both PVC- and PFAS-free, reflecting our commitment to responsible material use.

The EXPERIENCE column is designed to last. In addition to the extensive testing all LINAK products undergo, it is tested to an impressive 25,000 cycles (centrally loaded) and backed by a 10-year warranty – a testament to its durability.

The complete EXPERIENCE™ programme, comprising eight variants in different sizes, shapes, and stages, integrates seamlessly with existing control boxes, desk panels, frames, and feet. It is fully designed with backward compatibility and supports our Plug & Play™ approach.

This makes EXPERIENCE easy to integrate into your existing product portfolio and simplifies upgrades and scaling – without excess stock.

Built for business

EXPERIENCE columns are designed to enhance performance and meet growing market demand for sustainable solutions – all at a competitive price point.

This is not just an upgrade. It is a new generation of lifting columns engineered to give you a competitive edge.

In short, EXPERIENCE is engineered to perform and built to last – with no compromises – making it the ideal choice for Strata 360 Workstations.

LifeTrack™ Program

The Burgtec Commitment

burgtec

Our goal is to create smarter, more sustainable workspaces where every workstation delivers lasting value, minimises waste, and maximises economic return over its lifetime.

Burgtec LifeTrack™ is more than a warranty. It's a rethinking of how workplace furniture is designed, maintained, and valued. It's about reducing waste, prolonging life, and introducing intelligence into every workstation we make. Burgtec's leadership in commercial furniture design now extends beyond craftsmanship and design excellence. It extends into measurable sustainability and smarter lifecycle management.

Our industry faces a major environmental challenge: millions of desks and workstations end up in landfill every decade. Most of these items are disposed of not because they're unusable, but because traditional warranty structures and procurement models encourage replacement instead of renewal. LifeTrack™ reverses that logic.

By introducing a cycle-based warranty, a next-generation sustainable actuator system from LINAK®, and a data-driven smart desk ecosystem powered by DPG, Burgtec positions itself as the first Australian manufacturer to offer a genuinely circular model for workstations.

Traditional warranties assume all desks are used equally, which is far from reality. Data from Burgtec's 2025 usage analysis shows vast disparities between actual use patterns. A fixed 10-year warranty penalises light users while barely covering heavy-use environments. LifeTrack™ ties coverage to cycles*, not time, ensuring fairness, transparency, and sustainability.

*each "cycle" being defined as a complete finished movement in both the "upwards" and "downwards" direction.

Together, these pillars make Burgtec's LifeTrack™ a unique sustainability framework that merges hardware, data, and lifecycle design.

Cycle-based Extended Warranty

Measured by real-world actuator cycles, not years. Every workstation is individually auditible and re-certifiable.

Sustainable LINAK® EXPERIENCE Hardware

The strongest, smartest, and greenest actuator system ever produced, built for 25,000+ cycles and zero standby power waste.

Smart Workstations with AXON Systems technology

IoT-connected desks that monitor use, enable booking, track cycles, and integrate into ESG dashboards.

Curated Palette

All frames are available in Curated Palette colours

burgtec

We have extended our powdercoat finishes with five exclusive “Curated Palette” colours.

5 New Colours – Key Points:

- Workstations are now in stock in 5 new colours:
Kalamata, Eucalypt, Bluestone, Burnt Ochre, Baye
- No minimum order quantities
- Minimal extra charge, and the **same lead times** as Black and White

Benefits:

- Specify with confidence – clients can easily match custom colours in future (no long lead times or MOQs)
- Bring a point of difference into your fitout – a wider choice beyond the standard Black/White options
- Direct Laminex matches (Kalamata, Eucalypt, Bluestone, Burnt Ochre, Baye) for seamless joinery coordination
- All other metal products (tables, chairs, storage) can be upgraded to these finishes
- Colour can help defining zones within the fitout design, and assist users with wayfinding especially on larger floorplates

This gives you more flexibility when designing workspaces.

All Strata 360 frames (and any other metal based products such as table bases, lounge frames and chair bases) can now all be finished to perfectly match fabrics, laminates and acoustic panels for a more cohesive, tailored look.

Finishes and materials

FABRICS

Atlas (Heavy commercial, 100% polyester, 3 year warranty, 130,000 cycles martindale)

Curated by the Burgtec team, with 45 colours to choose from, the Atlas Extended fabric range is a durable, hard-working option for short lead-time projects, performing exceptionally in Martindale testing with an impressive 130,000 cycles.

Morocco (Commercial, 80% polyvinyl chloride, 20% polyester, 3 year warranty, 80,000 cycles martindale)

Stocked by Burgtec, available in 11 colours, this easy-to-clean vinyl range is a practical choice for healthcare, education and other regularly cleaned spaces, with the added benefit of being a budget-friendly alternative to leather and ideal for short lead-time projects.

ACOUSTIC PANELS

Aura Panel (100% polyester, min 75% recycled PET bottles, Global Greentag Certified)

Lightweight, pinnable, printable and easy to cut and install, designed to pair seamlessly with all our workstations. Our acoustic panels finish cleanly without frames or edging, and are made with a minimum of 75% post-consumer recycled PET from plastic bottles.

LAMINATE

Laminate, featured selection (28 Colours, with 5 matching our powder coating range, 3600x1800)

A versatile commercial surface, ideal for clean, consistent finishes across our workstations, tables and storage units. Built around popular Laminex decors, with options like Structural MR MDF for added impact resistance and Protec+ for extra hygiene.

POWDER COATING

Workstation frames, table bases, lounge frames and chair bases can now all be finished to perfectly match fabrics, laminates, and acoustic panels for a more cohesive, tailored look.

Care and maintenance

Our products are made to last and to do so they require regular care. Every material has its own best way to clean and maintain, and we're here to help you choose what works best for your space. If your project has unique requirements or a specific use case, our team can guide you through the right approach. We see care as part of the ongoing partnership, helping you keep your spaces performing well over time.

Laminate Surfaces

Clean with a damp, soft cloth or sponge using lukewarm water. Neutral diluted detergent may also be used with lukewarm water. Strong detergents which contain bleach, acid or have an abrasive effect (such as scouring creams) should be avoided.

Metal surfaces (except stainless steel)

Clean with a damp, soft cloth or sponge using lukewarm soapy water. Strong detergents which contain bleach, acid or have an abrasive effect (such as scouring creams) should be avoided. Sponges and scourers made from synthetic fibres or metal which may leave permanent scratches on the surfaces should also be avoided. Ensure product is dried with clean fibre-free cloth after washing.

Stainless steel

Stainless steel needs constant care and preventative maintenance. The surface needs to be wiped dry of moisture daily. This is to prevent the moisture being trapped under a cover of dust or sea spray which results in tea staining. Stainless steel should be cleaned with 'White Lily' cream cleaner (no abrasive) or a stainless-steel cleaner – usually in a spray can. Wipe over surface in direction of finish lines.

Plastic

These materials are fairly resistant to damage from dirt. Regular dusting should help keep the surfaces free from dirt and help stop any scratches occurring. Avoid contact with boiling water, high heat, flame, and abrasives. Wash in warm soapy water and apply pressure where necessary, drying afterwards with a clean cloth. Do not use strong or abrasive cleaning fluids or detergents, as these may affect the colour and finish of the surface.

Fabric

For a general clean, regular dusting and vacuuming removes any loose particles and stops dirt from entering the weave and breaking down the fibres. When necessary, the upholstery should be gently wiped with a clean cloth, dampened with warm soapy water. Immediately dry with a clean and dry non-abrasive cloth. Do not use strong or abrasive cleaning fluids or detergents, as these may affect the colour and finish of the fabric. Upholstery can be professionally dry-cleaned if required. For best care and maintenance results please follow manufacturer's instructions.

Leather

Periodically dust with a clean, dry soft cloth. Do not expose your furniture to prolonged sunlight or other heat sources as this may cause fading. Avoid extremes of humidity. For dried soiling: gently brush with a soft brush or gently clean with a vacuum cleaner. For wet soiling and deep cleaning: gently remove the excess substance from the surface with absorbent paper. With a clean cloth soaked in a mild soap solution, gently remove the stain. Do not soak the surface, dry and buff immediately with a clean cloth. For best care and maintenance results please follow manufacturer's instructions.

Vinyl, PU & Faux Leather

Periodically dust with a clean, dry soft cloth. Do not expose your furniture to prolonged sunlight or other heat sources as this may cause fading. Avoid extremes of humidity. For dried soiling: gently brush with a soft brush or gently clean with a vacuum cleaner. For wet soiling and deep cleaning: gently remove the excess substance from the surface with absorbent paper. With a clean cloth soaked in a mild soap solution, gently remove the stain. Do not soak the surface, dry and buff immediately with a clean cloth. For best care and maintenance results please follow manufacturer's instructions.

Real People. Speed. Precision. Scale.

We make commercial furniture in Australia for workplaces and public spaces. Since 1981, we've designed and manufactured locally, working directly with clients and project teams to deliver solutions that fit the space, the brief and the budget. Built to perform every day, and built to last.
